

Application method

If masonry is friable/powdery or where previous paint has lost its adhesion to reveal the underlying cement render, you will need to apply a coat of our Masonry Stabiliser and sealer.

Proud Paints™ Masonry Sealer 1 part is diluted with 3 parts water. 1 litre of mixed solution will cover 20 m².

Apply by brush or roller over the masonry to be sealed.

Always wear appropriate safety wear, goggles, gloves and overalls.

Proud Paints™ Masonry Sealer is an emulsion based water dilutable sealer for absorbent masonry surfaces.

Dries in 3hrs and can painted over with Proud Paints™ Smooth masonry or Textured high build paint, once the sealer is dry to touch.

Fast drying water-borne formulation, clear in colour.
